expressed in thousands of Canadian dollars, except share and per share amounts

1. NATURE OF OPERATIONS

Imperial Metals Corporation (the “Company”) is incorporated under the laws of the Province of British Columbia, Canada, and its principal business activity is the exploration, development, and production of base and precious metals from its mineral properties. The head office, principal address and registered and records office of the Company are located at 580 Hornby Street, Suite 900, Vancouver, British Columbia, Canada V6C 3B6. The Company’s shares are listed as symbol “III” on the Toronto Stock Exchange.

The Company’s key projects are:

- 100% interest in the Mount Polley copper-gold mine in central British Columbia, and
- 30% interest in the Red Chris copper-gold mine in northwest British Columbia.

These condensed consolidated interim financial statements have been prepared on a going concern basis which assumes the Company will continue operating in the foreseeable future and will be able to service its debt obligations, realize its assets and discharge its liabilities in the normal course as they come due. The Company has in place a planning, budgeting, and forecasting process to determine the funds required to support the Company’s operations and expansionary plans.

The Company has financed its operating cash requirements primarily through revenues generated by its 100% interest in the Mount Polley mine, its 30% interest in the Red Chris mine, debt facility, debentures and equity raises. The Company’s ability to realize the carrying value of its assets and to continue as a going concern is based upon the continued support of our shareholders, senior lender and the operational success at our operating mines. It will be necessary for the Company to raise additional funds from time to time for the continued execution of its strategic plan which is to see increased cash generation from its operating mines. These additional funds may come from sources which could include the issuance of shares, the issuance of debt or alternative sources of financing.

The Company has in place a robust planning, budgeting, and forecasting process to determine the funds required to support its operations and expansionary plans. The Company has prepared the condensed consolidated interim financial statements on the basis that it will continue to operate as a going concern.

2. MATERIAL ACCOUNTING POLICIES

Statement of Compliance

The annual consolidated financial statements are prepared in accordance with IFRS[®] Accounting Standards (“IFRS Accounting Standards”) as Issued by the International Accounting Standards Board (“IASB”). These unaudited interim condensed consolidated financial statements have been prepared in accordance with IAS 34, Interim Financial Reporting (IAS 34).

These condensed consolidated interim financial statements should be read in conjunction with the audited consolidated financial statements of the Company for the year ended December 31, 2025.

Investments in an associate

An associate is an entity over which the Company has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies. The Company’s investment in its associate is accounted for using the equity method.

Under the equity method, the investment in an associate is initially recognized at cost. The carrying amount of the investment is adjusted to recognize changes in the Company’s share of net assets of the associate since the acquisition date. The statement of income reflects Company’s share of the results of operations of the associate. Unrealized gains and losses resulting from the transactions between the Company and the associate are eliminated to the extent of the interest in the associate. The financial statements of the associate are prepared for the same reporting period as the Company. When necessary, adjustments are made to bring the accounting policies in line with those of the Company.

New Standards, Interpretations and Amendments

The accounting policies adopted in the preparation of the condensed consolidated interim financial statements are consistent with those followed in the preparation of the annual consolidated financial statements for the year ended December 31, 2025, except for the adoption of new standards effective as of January 1, 2026. The Company has not adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

The following amendments are applied to transactions that occur on or after the beginning of the earliest comparative period presented. We do not expect these amendments to have a material effect on our financial statements:

- Amendments to IAS 21 Lack of Exchangeability;
- IFRS 19 Subsidiaries without Public Accountability: Disclosures; and
- Amendments to the Classification and Measurement of Financial Instruments—Amendments to IFRS 9 and IFRS 7.

Amendments to IFRS 9 and IFRS 7 – Amendments to the Classification and Measurement of Financial Instruments

In May 2024, the IASB issued Amendments to the Classification and Measurement of Financial Instruments – Amendments to IFRS 9 and IFRS 7. These amendments updated classification and measurement requirements in IFRS 9 Financial Instruments and related disclosure requirements in IFRS 7 Financial Instruments: Disclosures. The IASB clarified the recognition and derecognition date of certain financial assets and liabilities, and amended the requirements related to settling financial liabilities using an electronic payment system. It also clarified how to assess the contractual cash flow characteristics of financial assets in determining whether they meet the solely payments of principal and interest criterion, including financial assets that have environmental, social and corporate governance (ESG)-linked features and other similar contingent features. The IASB added disclosure requirements for financial instruments with contingent features that do not relate directly to basic lending risks and costs, and amended disclosures relating to equity instruments designated at fair value through other comprehensive income.

The amendments are effective for periods beginning on or after January 1, 2026, and adoption of these amendments did not have a material effect on our condensed interim consolidated financial statements. For financial liabilities settled in cash using an electronic payment system, we applied the election to deem these financial liabilities to be discharged before the settlement date. The amendments have been applied retrospectively with no restatement of comparative information, in accordance with transition requirements on initial application of IFRS 9. The adjustment to the cash balance is reflected as an \$1,660 increase to the opening balance of cash and cash equivalents in the consolidated statement of cash flows.

IFRS 18 Presentation and Disclosures in Financial Statements

In April 2024, the IASB issued IFRS 18, Presentation and Disclosure in Financial Statements (IFRS 18), which replaces IAS 1, Presentation of Financial Statements. IFRS 18 introduces a specified structure for the income statement by requiring income and expenses to be presented into the three main categories of operating, investing and financing, and by specifying certain defined totals and subtotals. An entity may use certain subtotals of income and expenses in public communications outside the financial statements to communicate management's view of an aspect of the financial performance of the entity as a whole to users, and these subtotals are not specifically required by IFRS Accounting Standards. IFRS 18 requires companies to disclose explanations around these measures, which are referred to as management-defined performance measures (MPMs). IFRS 18 also provides additional guidance on principles of aggregation and disaggregation that apply to the primary financial statements and the notes. IFRS 18 will not affect the recognition and measurement of items in the financial statements, nor will it affect which items are classified in other comprehensive income (loss) and how these items are classified. The standard is effective for reporting periods beginning on or after January 1, 2027, including for interim financial statements. Retrospective application is required and early application is permitted.

We are continuing to assess and quantify the effect of this standard on our condensed interim consolidated financial statements. The standard is expected to result in changes to the presentation of our consolidated statements of income, by requiring all income and expenses to be classified into the three main categories of operating, investing and financing. Specifically, we anticipate changes to the presentation of certain income and expense items, for example, that foreign exchange gains and losses will be classified in the same category as the items that gave rise to the exchange difference, rather than being combined into one line. The cash flow statement will begin with the new IFRS 18-specified subtotal of operating profit. We will also have enhanced note disclosures on any identified MPMs, such as adjusted EBITDA. We expect to apply IFRS 18 on its effective date with full retrospective application, including restated comparative information.

Less non-current inventory	(71,269)	(57,471)
Total current inventory	\$114,745	\$98,649

During the three months period ended March 31, 2026, inventory of \$101,340 was recognized in cost of sales (March 31, 2025-\$86,981) and a net impairment charge of \$74 (March 31, 2025-\$4,469 of net impairment charge) on stockpile ore, concentrate and supplies inventory was included in cost of sales.

As at March 31, 2026, the Company had \$71,977 (December 31, 2025-\$60,965) of inventory pledged as security for the credit facility (Note 7).

4. EQUITY INVESTMENTS

On March 6, 2026, pursuant to a non-brokered, private placement, the Company purchased 10,000,000 Units of Andex Gold Inc. ("AndeX Gold"), a private company incorporated under the laws of Ontario, at a price of US\$1.00 per Unit for an aggregate purchase price of US\$10.0 million. Each Unit consisted of one Class A common share in the capital of AndeX Gold and one Class A common share purchase warrant (each a "Warrant"), with each Warrant entitling the purchase of one Class A common share of AndeX Gold at a per share price of USD\$1.50 for up to 36 months following the Closing Date. AndeX Gold holds 96% of the issued and outstanding shares of AndeX Minerals Inc., a private company incorporated under the laws of Ontario, which owns the Sofia property (formerly known as the Anocarire project) in Chile. Proceeds from the sale of the units by AndeX will be used to fund the continued exploration and development of the Sofia property in Chile.

As at March 31, 2026 Andex Gold is a private entity that is not listed on any public exchange. The Company has a 10% interest and representation on the Board of Directors of AndeX Gold. The investments in AndeX Gold is accounted for using the equity method in the condensed consolidated interim financial statements.

Red Chris Mine

Red Chris Development Company Ltd., a wholly owned subsidiary of the Company, owns a 30% beneficial interest in the Red Chris copper/gold mine in northwest British Columbia. The Company and Newmont Corporation (“Newmont”) have a joint venture for the operation of Red Chris mine, with Newcrest Red Chris Mining Limited, a wholly owned subsidiary of Newmont, acting as operator. The property is comprised of the Red Chris Main claim group (51 tenures / 17,149 hectares), the Red Chris South group (27 tenures / 6,097 hectares), the GJ Connector (2 tenures / 972 ha), the GJ group (87 tenures / 39,432 hectares) and the Hawkeye group (McBride, Railway and Todogin claims, (37 tenures / 8,225 hectares) consisting of 204 mineral tenures (71,875 hectares). Five of the Red Chris Main tenures are mining leases (5,141 hectares). Net smelter royalties of 2.0% are payable on the current tenures which are being mined from the Red Chris mine.

Mount Polley Mine

The Mount Polley copper/gold mine in central British Columbia is owned 100% by Mount Polley Mining Corporation, a wholly owned subsidiary of the Company. The property encompasses 24,096 hectares consisting of seven mining leases (2,007 hectares) and 52 mineral claims (22,089 hectares). A production royalty of \$2.50 per tonne on the first 400,000 tonnes of ore milled and \$1.25 per tonne for any additional ore milled is payable from Mining Lease 933970. The rate may be reduced to \$0.62 per tonne by the Company making a payment of \$1,000,000. In October 2019, Mount Polley Mining Corporation acquired an option to acquire seven adjacent mineral tenures (3,331 hectares) and the option was exercised on December 30, 2022. These claims are subject to a production royalty of \$1.25 per tonne of ore milled. The Company has the right to make a payment of \$1,000,000 to have the production fee reduced by 50%. There is currently no ore being mined on tenures which are subject to the production royalties.

Huckleberry Mine

The Huckleberry copper mine in west-central British Columbia is 100% owned by Huckleberry Mines Ltd., a wholly owned subsidiary of the Company. The property encompasses 25,767 hectares, consisting of two mining leases (2,422 hectares) and 49 mineral claims (23,345 hectares).

Huckleberry mine operations were suspended in August 2016. The mine remains on care and maintenance status until the economics of mining improve.

Other Exploration Properties

The Company has a portfolio of 23 greenfield exploration properties located mainly in British Columbia.

Impairment or Impairment Reversal Analysis of Mineral Properties

In accordance with its accounting policies and processes, each asset or cash-generating unit (“CGU”) is evaluated to determine whether there are any indications of impairment or impairment reversal. If any such indications of impairment exist, a formal estimate of the recoverable amount is performed.

Based on the Company’s assessment with respect to possible indicators of either impairment or reversal of previous impairments to its mineral properties, including the impact of current macroeconomic and geopolitical uncertainties on the operations and the prevailing market metals prices, the Company concluded that as of March 31, 2026, there were no impairment or impairment reversal indicators for the Company’s mineral properties (December 31, 2025-no impairment or impairment reversal indicators identified).

9. FUTURE SITE RECLAMATION PROVISIONS

The Company has recognized provisions for future site reclamation at its Red Chris, Mount Polley, Huckleberry, Ruddock Creek and Catface properties. Although the ultimate amounts of the future site reclamation provisions are uncertain, the provision of these obligations is based on information currently available, including closure plans and applicable regulations. Significant closure activities include land rehabilitation, water treatment, demolition of facilities, monitoring and other costs.

The total undiscounted amount of estimated cash flows required to settle the Company's estimated future closure and decommissioning costs is \$538,071 (December 31, 2025-\$409,448). The estimated future cash flows were then inflated using inflation rate 2.0% (December 31, 2025-2.0%). The total provision for closure and decommissioning costs is calculated using discount rates between 3.88% to 4.88% (December 31, 2025-3.84% to 5.84%). Obligations in the amount of \$319,452 are expected to be settled in the years 2026 through 2055.

(iii) Warrants

In connection with the issuance of certain non-convertible debentures (Note 8), the Company issued 6,056,250 common share purchase warrants which are exercisable into common shares of the Company at a price of \$2.10 per share for a period of four years from the date of issuance. The warrants expire on December 23, 2026. The fair value of the warrants was estimated using the Black-Scholes option pricing model using the following assumptions: risk-free interest rate of 3.38%, expected dividend yield of nil, expected stock price volatility of 67.62% and expected life of 4 years.

During the three months ended March 31, 2026, total of nil warrants were exercised and the company issued nil of common shares (year ended December 31, 2025, total of 265,625 warrants were exercise). At March 31, 2026 the total of 5,790,625 warrants remain outstanding.

18. FINANCIAL INSTRUMENTS, INTEREST RATE AND CREDIT RISK

During the reporting period, the Company examined the various financial instrument risks to which it is exposed and assessed the impact and likelihood of those risks. These risks may include credit risk, liquidity risk, market risk and other price risks. Where material, these risks are reviewed and monitored by the Board of Directors.

Capital Risk Management

The Company manages its capital to ensure that it will be able to continue as a going concern while maximizing the return to stakeholders through the optimization of the debt and equity balance. The capital structure of the Company consists of equity comprised of share capital, contributed surplus, currency translation adjustment and retained earnings.

Credit Risk

The Company's credit risk is limited to cash, trade and other receivables, and future site reclamation deposits in the ordinary course of business. The credit risk of cash and future site reclamation deposits is mitigated by placing funds in financial institutions with high credit quality.

NOTES TO THE UNAUDITED CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

For the Three Months Ended March 31, 2026 and 2025

Liquidity Risk

The Company has a planning and budgeting process in place to help determine the funds required to support the Company's normal operating requirements on an ongoing basis and its planned capital expenditures. The Company ensures that in addition to cash balances there are sufficient committed credit facilities, including the advance payment facilities with its customers, to provide cash necessary to meet projected cash requirements.

The Company holds investments in mineral and exploration properties. While these may be convertible to cash they are not considered when assessing the Company's liquidity as they are part of the risk management program of the Company, long-term strategic holdings, or are only convertible to cash over a longer time horizon if realizable values exceed management's assessment of fair value, respectively.

Cash balances on hand, the projected cash flow and the available credit facility, are expected to be sufficient to fund the Company's obligations as they come due. However, there are inherent risks related to the operation of the Company's mines which could require additional sources of financing.

Liquidity risk is also impacted by credit risk, although the Company considers this risk low.

Currency Risk

Financial instruments that impact the Company's net income and comprehensive income due to currency fluctuations include US dollar denominated cash, trade, and other accounts receivable, reclamation deposits, trade and other payables and debt. If the US Dollar had been 10% higher/lower and all other variables were held constant, net income and comprehensive income for the three months ended March 31, 2026 would have been higher/lower by \$2,605.

Interest Rate Risk

The Company is exposed to interest rate risk on its credit facilities and advanced development loan (Note 7). The Company monitors its exposure to interest rates and is comfortable with its current exposure. The Company has not entered into any derivative contracts to manage this risk. If interest rates had been 100 basis points higher/lower on the Company's floating rate debt and all other variables were held constant, the amount of interest expense during three months ended March 31, 2026 would have increased/decreased by \$264.

Provisionally Priced Revenues

As a result of the provisional pricing terms in its sales contracts, the Company is exposed to commodity price risk until final pricing is determined. Therefore, revenues in subsequent periods will be adjusted for any changes to provisionally priced accounts receivables outstanding at period end. Final pricing is usually four to five months after the date of shipment and therefore changes in metal prices may have a material impact on the final revenue.

Provisionally priced revenues is comprised of the following:

	Three Months Ended March 31 2026		Three Months Ended March 31 2025	
	Provisional lb/oz	Provisional Price per lb/oz	Provisional lb/oz	Provisional Price per lb/oz

Copper	13,109.0	\$5.54	6,748.2	\$4.40
Gold	6.6	\$4,663	11.2	\$3,128

Fair Value Estimation

The fair value of financial instruments traded in active markets (such as marketable securities) is based on quoted market prices at the statement of financial position date. The quoted market price used for financial assets held by the Company is the current bid price. The fair value of derivative instrument assets and liabilities are determined by the counterparties using standard valuation techniques for these derivative instruments. The carrying value less impairment provision, if necessary, of trade and other receivables and trade and other payables are assumed to approximate their fair values.

IFRS 13 *Fair Value Measurement* requires disclosures about the inputs to fair value measurement, including their classifications within a hierarchy that prioritizes the inputs to fair value measurement. The three levels of the fair value hierarchy are:

Level 1 – unadjusted quoted prices in active markets for identical assets or liabilities,

Level 2 – inputs other than quoted prices that are observable for the asset or liability either directly or indirectly, and

Level 3 – inputs that are not based on observable market data.

The Company does not have any financial instruments measured at fair value through other comprehensive income.

The fair value of the Company's financial instruments has been classified within the fair value hierarchy at March 31, 2026 as follows:

	Carrying value at amortized cost	Fair Value Through Profit or Loss			Total
		Level 1	Level 2	Level 3

19. COMMITMENTS AND PLEDGES

The Company has pledged the following assets for settlement of future site reclamation provisions:

	March 31 2026
Letters of credit and reclamation surety bonds	\$186,133
Reclamation deposits	416
	<u>\$186,549</u>

20. CONTINGENT LIABILITIES

The Company is from time to time involved in various claims and legal proceedings arising in the conduct of its business. At the reporting date, none of such claims and legal proceedings are considered probable of resulting in a material loss or judgment against the Company.

On December 6, 2024, the Federal Crown preferred a direct indictment against the Company and others, including its subsidiary Mount Polley Mining Corporation. The indictment alleges 15 contraventions of the Fisheries Act from events that occurred more than 10 years ago arising from the alleged discharge of deleterious substances from the tailings storage facility at the Mount Polley Mine on August 4, 2014. No trial date has been set and interlocutory issues have been and continue to be argued before the court. Accordingly, the Company is unable to reasonably assess the potential outcomes of this indictment.

In April 2025, the Xatśūll First Nation (“Xatśūll”) commenced a petition for judicial review seeking to set aside two decisions (the “Decisions”) granted by the Ministry of Mining and Critical Minerals and the Minister of Environment and Parks pertaining to the Mount Polley Mine. Shortly afterward, Xatśūll filed an application seeking to stop work under those decisions until the judicial review is heard (collectively, the “Application”). On August 6, 2025, the Supreme Court of British Columbia released its oral decision to dismiss the Application on the basis that the Decisions were reasonable and correct and the consultation was adequate and conducted fairly. Xatśūll has appealed, but is no longer seeking injunctive relief. The appeal hearing has been scheduled to occur on October 22-23, 2026.
